Irvine, CA | +1 562-373-8199 | mvardham@uci.edu | [linkedin.com/in/manasvi-varldham/](https://www.linkedin.com/in/manasvi-varldham/) | manasvivardham.site

EDUCATION

University of California, Irvine, The Paul Merage School of Business

Master of Science in Business Analytics

Irvine, CA

Graduation Date : June 2026

Whittier College

Bachelor of Arts in Computer Science and Economics (Dean's List, 4 years)

Whittier, CA

Graduation Date : May 2025

EXPERIENCE

Edwards Lifesciences

Data Analyst (Capstone Project)

Irvine, CA

January 2026 - Present

- Conducting end-to-end analysis of China's MDR regulatory reporting workflow to identify process bottlenecks and drive AI-enabled process automation strategy.
- Evaluating translation and multi-layer quality review processes to assess AI-driven automation solutions and ensure scalable, compliant regulatory reporting.

Whittier College

Undergraduate Research Fellow

Whittier, CA

May 2024 - April 2025

Project: Advanced Simulation of Neutrino Energy Predictions (Predictive Modeling & Data Analysis)

- Evaluated model performance using regression on datasets comprising thousands of simulated neutrino observations, identifying key factors affecting prediction accuracy across simulated datasets.

Whittier College - Office of Institutional Effectiveness

Data Analyst Intern

Whittier, CA

August 2023 - April 2025

- Designed an interactive NSSE Dashboard leveraging Power BI to consolidate student survey data; leading to a 20% uptick in actionable insights, impacting student satisfaction KPIs for program administrators.
- Conducted student-athlete persistence study by analyzing 8 years of enrollment data (2016–2024) across 2,000+ student records to identify retention and graduation rate trends.

IQVIA

Data Analyst Intern - AIML Engineering

Bangalore, IND

May 2023 - August 2023

- Developed a 99% accurate Python-based disease detection conversational chatbot using OpenAI's GPT-4 language model enhancing user accessibility to insights and automating data analysis.
- Built a Python script that used APIs to enable automation of analysis of HCP interview transcripts to derive meaningful patterns and trends, resulting in a 43% decrease in manual labor.

ACADEMIC PROJECTS

Financial Sentiment Analysis & LLM Reliability Evaluation

August 2025

- Evaluated 3–4 large language models on 80,000+ financial social media posts, benchmarking against FinBERT using accuracy and macro-F1 to assess sentiment classification performance.
- Performed error analysis on numerical reasoning and mixed sentiment cases using Python, identifying 3+ failure patterns in high-stakes financial applications.

Predictive Modeling of Anxiety & Depression from Social Media Usage

April 2024

- Engineered predictive models for GAD-7 and PHQ-9 anxiety/depression outcomes using 8,000+ observations, achieving 12% increase in prediction accuracy.
- Applied data cleaning, feature engineering, and model evaluation (RMSE, accuracy, precision, recall), including hypothesis testing, to identify key predictors and assess predictive performance.

SKILLS

Programming: Python, SQL, R

Data Analysis: Data Cleaning, EDA, Regression, Classification, Feature Engineering, Hypothesis Testing

Visualization & BI: Power BI, Tableau, Excel, Dashboard Development, KPI Reporting

Tools: MySQL, Git, Pandas, NumPy, Scikit-Learn
